

Dear pilots,

the summer update of your Aerodrome Database - VFR Flight Guide of the Czech Republic and Slovak Republic is just out. The summer amendment service takes the form of hand amendments as listed below. Summer update is published during June/July (according to the published amendments), and contains important amendments that became effective since the release of the current Aerodrome Database and expected amendments in the summer season.

Thanks to you for purchasing and using the Aerodrome Database. I hope it will be an asset to you. We try to make your flying to the Czech and Slovak Republics more comfortable and much safer, too.

I wish you many happy landings and beautiful summer full of aeronautical adventures!

Patrik Sainer, publisher of your Aerodrome Database

Praha, June 2018

ATTENTION: The amendment service contains the significant amendments affecting the safety of VFR air traffic! Minor changes (such as a slight change in landing fees, the available lubricants, minor changes in physical characteristics, minor changes in text and so on) are not included in the summer amendment service and will be incorporated to the new edition of Aerodrome Database on next year.

AERODROME DATABASE 2019

The new Aerodrome Database 2019 will be released on March/April as each year.

APP DATABÁZE LETIŠŤ FOR APPLE MOBILE DEVICES

We will update the data and charts in our application for tablets and phones from Apple (under operating system iOS) with the issuance of this amendment service (update will be available from June 21st). All you have to do is just open info-window (via the icon "i" in a circle on the top bar), choose from the menu "Data Manager - downloads and updates" and download the actual data to your tablet/phone. You can find details at: www.aerobaze.cz/app/

AERODROME DATABASE IS AVAILABLE FOR SKYDEMON MOBILE APP

SkyDemon app for **Android and Apple** mobile devices now contain complete aerodrome information from your Aerodrome Database. Including detailed arrival/departure charts showed as background at navigation screen including your current position and your planned route. You can find details on: <http://www.skydemon.aero/store/letist.aspx> !
